

Rooney Law proudly operates with an unwavering commitment to environmental stewardship; we embrace a fully digital infrastructure, and we prioritize eco-friendly solutions. Our virtual presence is not just about convenience; it's a conscious choice to minimize the impact our firm has on the environment. We use cloud-based technologies for internal and external collaboration, reducing the need for physical infrastructure and its associated energy consumption. By avoiding printing entirely and embracing digital documentation, we eliminate paper waste and significantly reduce the carbon emissions associated with traditional printing processes. Additionally, we encourage remote work arrangements whenever feasible, further reducing carbon emissions from commuting. Our commitment reflects our deep-seated values and dedication to sustainability. We continuously seek out innovative ways to lessen our impact on the environment, demonstrating that even in a digital world, environmental responsibility remains paramount.
